

NEWHOUSE 8 & 10 BALE SQUEEZE UNITS COMES COMPLETE WITH UNIVERSAL MOUNTING BRACKETS FOR MANY MAKES OF LOADERS

BALE SQUEEZE SIDE ARMS ARE MADE OF 3/4" HIGH TENSILE STEEL. THIS PROVIDES GREAT STRENGTH. THE NARROW 3/4" ARMS WILL MAKE A TIGHTER STACK WITH VERY LITTLE GAP BETWEEN ADJACENT BALE, ALSO HANDY WHEN RETRIEVING FROM A TIGHT STACK

THIS PICTURE SHOWS THE REAR VIEW OF THE SQUEEZE, SHOWING THE CYLINDERS AND UNIVERSAL LOADER MOUNTING BRACKETS

SQUEEZE CAN BE CHANGED FROM AN 8 TO 10 BALE (OR VICE VERSA) BY REMOVING OR ADDING CYLINDER EXTENSIONS, AND SHORTENING OR REPLACING SLIDE BARS.

HOOK UP BRACKETS FOR LOADER ARE VERY UNIVERSAL. THE BRACKETS SLIDE ON A HEAVY KEYED TUBING FOR ANY WIDTH, TURN OVER FOR VERTICAL SPACING IF NECESSARY. THE BRACKETS ARE ALSO 2 PIECES SO SPACING CAN BE SET FOR LOADER ARM WIDTH.

= **NEWHOUSE** =
MANUFACTURING COMPANY

THE NEWHOUSE BALE SQUEEZE ALSO HANDLES LARGE BALES WITH EASE

**FAST, E-Z unloading from truck to hay stack or loading from hay stack to truck,
with a Newhouse Bale Squeeze**
